PROFILE

UAE National mathematics graduate (NYU Abu Dhabi, Dec 2024) with hands-on experience in private equity deal evaluation, quantitative portfolio analytics, and Python-based financial modelling. Targeting quant research, investment analysis, and portfolio analytics roles at sovereign wealth funds, hedge funds, and asset managers across the UAE & GCC.

EXPERIENCE

Active Investments & Equity Intern — **Abu Dhabi Investment Council (ADIC)** Jun – Aug 2023 | Abu Dhabi, UAE

- Engineered a Python multi-factor attribution model decomposing ~70% of return variance across 20+ external managers — enabling the team to identify alpha vs. beta contributions at the factor level.
- Refined portfolio-tracking software to forecast future manager returns; model output integrated directly into quarterly manager-review process.
- Analysed equity strategies across factors (value, momentum, quality, low-vol) using pandas, NumPy, and matplotlib; produced weekly performance dashboards for senior PMs.
- Collaborated with investment officers to stress-test portfolios against macro scenarios including rate shocks and EM currency devaluations.

Private Equity Intern — **Abu Dhabi Investment Authority (ADIA)** Jan – May 2023 | Abu Dhabi, UAE

- Built and defended 12+ APAC buyout case studies covering TMT, healthcare, and industrials; constructed 3-statement LBO models with bullish / base / bearish return scenarios.
- Performed IRR bridging analysis, entry/exit multiple sensitivity tables, and management waterfall calculations to frame investment committee recommendations.
- Conducted primary and secondary due diligence on 5 target businesses; synthesised findings into 6-page IC memos benchmarked against sector comps.
- Screened 40+ deal pipeline opportunities using proprietary scoring framework — shortlisted 8 for deeper review.

Research Intern — **MIT Zero Robotics (via MBRSC)** — **Mohammed Bin Rashid Space Centre** Jun – Aug 2022 | Dubai, UAE / MIT, USA

- Selected among UAE's top STEM students for MBRSC-sponsored program at MIT; developed graph-theory and Dijkstra-based path-optimisation algorithms in Python/MATLAB for NASA's Astrobee robot.
- Reduced simulated traversal time ~30% vs. baseline; algorithm competed in ISS Zero Robotics Final Tournament.

Quantum Computation Research Assistant — **NYU Abu Dhabi** Sep 2022 – Dec 2022 | Abu Dhabi, UAE

- Automated 50–100 MATLAB parameter sweeps for a 3-qubit XXZ Heisenberg model; reduced compute time ~40% through vectorised simulation pipeline.

CEO & Co-Founder — **Polygon Technical Infrastructures** 2021 – Present | Abu Dhabi, UAE

- Founded cybersecurity & bespoke software firm; led penetration testing, incident response, and full-stack development engagements for SME clients in the UAE.

Co-Founder — **RECTify Brokers** 2023 – Present | Abu Dhabi, UAE

- Built climate-tech platform for REC / carbon-credit procurement and audit-ready ESG reporting; aligned to UAE Net Zero 2050 mandate.

EDUCATION

BA Mathematics — Minor Computer Science — **NYU Abu Dhabi** Aug 2021 – Dec 2024 | Abu Dhabi, UAE

- GPA: 3.4 / 4.0
- Relevant coursework: Probability & Statistics, Real Analysis, Algorithms, Machine Learning, Econometrics, Linear Algebra, Discrete Math
- Awards: Inside ADIA Competition — 2nd Place (2023) | Wharton Innovation Competition — 3rd Place (2022)

SKILLS & TOOLS

Quantitative: Multi-factor attribution, LBO modelling, IRR analysis, 3-statement models, portfolio analytics, backtesting concepts, scenario/sensitivity analysis

Programming: Python (pandas, NumPy, matplotlib, scikit-learn), MATLAB, Java, C

Finance Tools: Bloomberg terminal (basic), Excel (advanced), financial data APIs

Other: React / TypeScript, MongoDB, DevOps, CI/CD, Git

Languages: Arabic (native), English (fluent)

INTERESTS

Quantitative trading & systematic strategies | Sovereign wealth & long-only investment | Commodities & energy markets | Carbon credits & ESG analytics
